

Hello! My name is Gumru and I was born and raised in Västerås and I am currently studying at Västerås Kulturskola. I love music in all its forms such as dancing, singing, theater and especially playing or creating music. My very first instrument that I started playing was piano, with my wonderful teacher Irina Krjutjkova. I have been playing the piano for almost 10 years. But after a while, I realized that my teacher was playing two instruments, piano and accordion. After I tried playing accordion for the first time I understood that accordion was my instrument. Later I realized that accordion has a lot more possibilities and I could express more emotions and passion when I played. My absolute biggest dream is to be able to play on a big stage and be appreciated and loved for my music.
